Education

School of Engineering, Cochin University of Science and Technology — Kochi, Kerala
B.Tech in Computer Science and Engineering — Expected May 2027

Experience

Software Development Engineer (SDE) Intern — June 2026
LogAI — Kochi, India

- Developed backend components for a multi-tenant AI chatbot SaaS platform using FastAPI, Python, PostgreSQL, MongoDB and Docker.
- Implemented scalable document ingestion pipelines involving parsing, chunking, embedding generation and vector storage in Qdrant to support Retrieval-Augmented Generation (RAG).
- Worked with asynchronous Python services, REST APIs, dependency injection, Redis, object storage and clean architecture principles.
- Contributed to backend debugging, deployment workflows, API development and performance optimization while collaborating with engineers.
- Worked with LangGraph-based agent orchestration, vector databases and modern AI application architecture.

Projects

Havenly | Next.js, React, TypeScript, FastAPI, Supabase, Python, scikit-learn

- Built a full-stack hostel recommendation platform with separate frontend, backend and ML microservice architecture.
- Designed the complete relational database schema in Supabase covering authentication, bookings, hostels, reviews, notifications and user profiles.
- Developed a FastAPI recommendation engine using KNN and natural-language preference extraction for personalized hostel recommendations.
- Integrated authentication, booking management, reviews and notification workflows into the web platform.

Kerala EV Charging Infrastructure Optimizer | Next.js, Flask, Leaflet.js, SQLite, SciPy

- Built a geospatial decision-support platform to identify optimal EV charging station locations across Kerala.
- Collected, cleaned and processed EV adoption, population density and power grid datasets to drive a multi-layer spatial optimization engine.
- Implemented backend APIs using Flask with SciPy KDTree for efficient spatial indexing and SQLite for data persistence.
- Built an interactive frontend using Next.js and Leaflet.js featuring heatmaps, draw-to-analyze polygons and real-time navigation.

Achievements

Hackathon Achievements

- 1st Prize — Hack for Tomorrow, Model Engineering College, Kochi
- 1st Prize — HackTillDawn, Mar Athanasius College of Engineering
- 3rd Prize — Code Kalari National Hackathon, IIIT Kottayam
- 3rd Prize — Asian School of Business Hackathon

Technical Skills

Languages: Python, C++, TypeScript, SQL
Backend: FastAPI, Flask, PostgreSQL, MongoDB, Redis
Frontend: React, Next.js
AI/ML: scikit-learn, Qdrant, LangGraph
Infrastructure: Docker, Linux, Git
